Table 3: Special-care need and the time use of women and men aged 15–64

	Women				Men
Outcome	Any need (1)	Carer available (2)	No carer (3)	Difference (4)	Any need (5)
Dependent-adult care (min)	35.7*** (1.3)	37.9*** (1.4)	20.8*** (2.8)	17.1*** (3.1)	14.3*** (1.0)
All caregiving, Division 4 (min)	49.8*** (1.9)	52.3*** (2.0)	32.8*** (4.8)	19.5*** (5.2)	21.7*** (1.5)
Unpaid domestic work (min)	7.4*** (2.7)	8.3*** (2.9)	1.7 (6.8)	6.6 (7.4)	6.8*** (1.5)
Employment (min)	-2.0 (3.4)	-3.7 (3.6)	9.7 (10.9)	-13.3 (11.5)	-0.8 (5.2)
Any employment on diary day (share)	0.015* (0.009)	0.011 (0.010)	0.043* (0.024)	-0.032 (0.026)	-0.003 (0.009)
Employed, usual status (share)	0.019** (0.009)	0.015 (0.009)	0.041 (0.025)	-0.026 (0.027)	0.010 (0.007)
Free time (min)	-29.0*** (2.9)	-28.6*** (3.2)	-31.9*** (7.4)	3.3 (8.0)	-11.9*** (3.8)
Sleep (min)	-5.2** (2.1)	-5.8** (2.3)	-1.2 (5.9)	-4.6 (6.3)	-6.6*** (2.0)

Notes: Each cell is the coefficient (SE) on the need indicator(s) from a separate survey-weighted regression; reference group: households with no member needing special care. Columns (2) and (3) come from one regression with both indicators; column (4) is (2) minus (3). Probable care recipients excluded. Controls: age band, education, marital status, urban, consumption quintile, household size, members 60+, children under six; state and day-of-week fixed effects. FSU-clustered SEs. * p<0.10, ** p<0.05, *** p<0.01.
